## **Current Progress at the Site**

---

This facility is one of EPA Region III's high priority RCRA corrective action sites. Edgewater Steel Co. clean closed an EAF dust waste pile in 1991 and closed in place a construction/demolition waste landfill in 1995. The facility shut down operations in 2001. In October, 2001 an environmental inspection was done. A draft (December, 2001) EI report is under review by the state.

EPA will evaluate the data in the report upon receipt from the state. If releases are identified, EPA will determine if a facility investigation or clean-up measures are necessary to protect human health and the environment.

## **Site Responsibility**

---

RCRA Corrective Action activities at this facility are being conducted under the direction of EPA Region 3 with assistance from the State.

## **Institutional Controls**

---

There are no institutional controls at this time.
